

# INDIGENOUS COST-EFFECTIVE SEABASS GROW OUT FEED SEABASS *Plus*

Asian sea bass also known as Barramundi is a high value, fast growing food fish, which is highly carnivorous and predatory in nature. ICAR-CIBA identified sea bass as a candidate fish for farming in brackishwater for diversification farming. Feeding such a carnivore sea bass is challenging in its farming, in terms of feed acceptance as well as feed cost. As outcome of continuous research, CIBA developed a cost effective feed for sea bass and branded it as "Seabass<sup>Plus</sup>".

## Features of the technology: Seabass<sup>Plus</sup>

- Scientifically formulated balanced formula for seabass
- Feed with good attractability and palatability
- Cost effective feed prepared using indigenous ingredients
- Nominal cost of feed - Rs. 75-85 per kg depending on the fat content
- Extensively field tested with FCR of 1.4-1.8 in grow-out phase

Available as

- I) Extruded floating feed
- II) Extruded slow sinking feed
- III) Pelleted sinking feed
- Suitable for nursery and grow out culture
- Nursery feeds from 500 -1500  $\mu$
- Grow-out feeds available from 1.8 to 8.0 mm pellets
- Suitable for feeding in pond and cage culture
- Technology ready for commercialization on non - exclusive basis
